## Hospital Audit of 192 Patients

**These are the results after 192 people (the vast majority being gastroenterology outpatients) received a single 20 minute Healing session at a Birmingham General Hospital.**

Voluntary Healing Trust Centres and private Healers are available throughout Britain

Following on from my previous hospital audit of 75 patients, the questionnaire for this second audit was slightly altered and makes a total of 267 patients whose response to Spiritual Healing has been recorded. The first audit was used as evidence towards a research grant application that was successful in gaining £205,000 for Birmingham University to research our Healing work at Good Hope Hospital. Work on this project is in full flow and will conclude in 2012.

None of the patients, in either audit, were looking for Healing. They were simply recommended to it by their consultant during their consultation with him and consequently received a Healing session immediately afterwards. Only a tiny proportion of these patients had accessed a complementary therapy of any description previously. The Department of Health's document 'Complementary Medicine Information for Primary Care Groups' reports that 'more than one in three adults' use one or more of the 8 therapies that the DoH named during their lifetime. Clearly, these figures are in no way reflected amongst the 267 patients included in my 2 audits, which leads me to suggest that people who embrace complementary therapies may be less likely to be troubled by a condition that warrants a consultant.

Anyone with IBS, psoriasis or eczema knows that their symptoms get worse when they are stressed or worried. This tells me that a physical chemical reaction is taking place in the body as a result of their negative emotional state. Healing deeply calms people but there is more going on than simply relaxation or placebo. For instance, research shows that Healing works under laboratory conditions on human tissue in Petri dishes, and also on animals and plants. See the [Research](#) for more information.

The questionnaires were completed after the gastroenterology patients had seen the consultant and before the Healing session. Figs 1, 2 and 3 show an improvement between 'over the past week' and 'before Healing', which shows that patients benefited from their consultation.

- Pains throughout legs and feet disappeared for a time during sessions and returned after the session.
- Felt shoulders melting into relaxation when Healer's hands on them. Tummy felt nice warmth.
- Mind blowing. Tingling sensation as though negativity was being brought out, though initially I was fighting what was being suggested completely. I feel a bit stronger.
- Felt as though deep sleep although could hear people/traffic outside. Feel a lot calmer now. Felt fluttering in area where IBS symptoms have usually been. One leg and I hand had muscle jumps (sometimes does when I relax).
- Neck, throat and right shoulder and head felt full of wool and as though couldn't move or swallow but actually could (and did!). At another time hands felt too heavy to move. Feel as though could go for a good sleep.
- Felt tingling where Healer was touching. When lying down, I usually hear my heart beat quite loudly but was a lot less during this session.
- Felt heat from Healer's hands even when not touching. Didn't relax as well as I thought I should have, but it's the first time I've done this.
- Felt warmth in area that had been painful when Healer's hands on that area. Just perfect.
- Feels like a weight has gone. Really nice. Excellent. I feel more alive.
- Purple clouds with black background changed to purple background with little bits of black that drifted away. Headache gone.
- Tingling in arms. Purple light seen by left eye. Right eye was seeing the Healer (even though my eyes were shut) in white light.
- Felt as though lit up to begin with and felt a little afraid but this passed about halfway through. Turmoil has changed to calmer feeling. Then golden light with purple appearing in the middle.
- At beginning, lights and red and green continually flashing out from body. Felt as though Healer was golden blob. Another golden blob

appeared then quite a few more appeared. Saw golden hands with extended long fingers of gold.

- Absolutely relaxing – like I would feel when on holiday. Tingling in end of fingers which became throughout whole body.

- Warm glow in arms and chest. Tingling in arms and legs. Eyes watered.
- Aware of golden light throughout session.
- Feel much better – more relaxed.
- Saw golden light. Tingling in my face.
- Felt worried for healer throughout. Heat and comfort in pelvic cradle and half way through and became more intense. Became the most relaxed that I've ever been in my life.
- Warmth throughout except feet. Lilac throughout. When Healer worked on feet, aware of lilac and green. When Healer worked on groin to knee, felt blood flow which made knee ache. Right eye has been a problem for 2 years. When healer was working in that area, it was as though a sharp needle (that didn't hurt) had pricked the right eye and feels better now as though cleared.
- Clearer headed. Felt warmth when Healer's hands on stomach area and back of neck. Felt light-headed and woozy when got off couch, which

cleared in a few minutes.

- As an ex-nurse, was paying attention logically but soon went with the relaxation; felt as though my hands had raised by an inch and felt as though Healer had put my hands back down but she hadn't done so (medical student present witnessed that the hands had not raised or been put down)
- Very calming and feel just at peace. Don't know how to explain the feeling.
- Felt as though areas were gently being "wringed". Healer's hands felt warm on the joints. Very comfortable.
- Warmth in pelvic and tummy area when Healer is on that area. More than when hands were on other areas.
- Soon relaxed. Didn't worry about a thing. Warmth in the belly. Felt chilled out.
- Orange/white tiny dot of light appeared from the right hand side which came and went over and over during the session.
- Came with extreme pain in left leg and hip but disappeared at the beginning of session. Had the sensation of leg and hip being in lapping water. Extraordinary!
- Excellent! Had arrived with trapped nerve pain from neck to r.h. which disappeared. Also had distended stomach which has noticeably reduced. Wow. I can't believe that arm is normal again. Felt as though I dropped off to sleep a few times. When Healer was around the head area, felt pressure (even though Healer not touching the area) and thought it would develop into a headache but simply disappeared instead.
- Felt that I'm much better than a month ago (had pneumonia). Felt heat in the part where the pain was (barely there now). When Healer touched felt at the beginning felt tingle in hands. Later Healer touched feet again and I felt tingling in base of head.
- Everything seems much better wherever Healer's hands had been, they left a warmth as though they were still there.
- Aches in every joint disappeared except for in r ankle and bottom of foot. Felt happiness.
- Tingling throughout the left hand side of body nearly all the time during the session.
- Shoulders feel freer and lighter. Feel really relaxed and a lot better. Very pleasantly surprised. Really chuffed. Can't believe how much better I feel.
- Amazed could physically see white in my eyes. Tingling started in my

head and spread all over. (This patient had received a Healing session 8/9 months previously and made this additional comment - Not had the abdominal pains since having the Healing session 8/9 months ago and following Dr Singh's advice of how to deal with worrying situations.)

- Felt concerned about the consultation, but feel better now. Bizarre! Didn't expect it to work as well as it did. Tingling in hands mostly and both arms. Loved it!

### **Patient Comments One Week After a Single 20 Minute Healing Session**

Of the 192 patients included in this study, 67 sent the following comments one week later:

- There was a change to the bowel movement until mid-week, then the panic situation returned.
- I felt a lot calmer, more peaceful – not rushing around so much.
- Had some upset in the last week. Felt very relaxed, but energised for the first couple of days. Did feel the benefit and would really like more.
- Moving house at the moment but been very relaxed.
- Felt better for longer. Only felt worse the last couple of days. I feel it's really making a difference.
- Went on holiday to Egypt straight after session. Felt real benefit. Able to cope with hassle from locals. I have benefited from session four weeks after. Much less anxious.
- It is nice to know that underlying problems can be resolved through having a Healing session.
- Even more stressed than usual due to family pressures and illness. Very happy to be part of future Healing sessions.
- Treatment did little for me. My mind was probably on the news I had just been given.
- Before Healing session, felt terrible and was a different person afterwards – an amazing session.
- Will make an effort to make time for future Healing sessions and to give it a go. I quite enjoyed the session at Good Hope.
- Amazed that, at the moment, I have no pain !
- Lost weight but still smoking.
- Have not felt like myself in some situations, but everyday anxiety has been better. Have felt calmer and am willing to try anything that will help.
- Would benefit from further treatment.
- I just can't seem to relax my mind enough to find the sessions helpful.
- I believe I did feel a benefit from my Healing session – maybe for 48

hours after that – back to how I feel now. The use of earplugs or earphones to subdue everyday noise, but to still allow you to hear the Healer speaking. A quiet environment I feel is essential and to be dimly lit.

- Have experienced a lot of dreams
- This treatment helped a lot with stress and sleeping.
- More peaceful at home.
- Very relaxing – thank you.
- Since the session I feel much more relaxed in general.
- The relaxation class was lovely, but still suffering with the pain in the bowel. It did me good at the time, but has not improved the pain in the bowel. I will try anything.
- Even though my symptoms have not changed, it gave me a sense of well-being on the day. Very relaxing and likeable.
- I have been sleeping well for the past 2/3 weeks. I have been feeling well in myself. Since the session and having one counselling session, I have come on in leaps and bounds. I would like more sessions as I need to overcome my fear of heights.
- There has been a positive effect and hopefully this will get better. I do find it very beneficial but would like regular sessions.
- Have felt more relaxed and calm.
- Did not feel as good as the first time I had a Healing session.
- Unable to relax as much this time. Still found it enjoyable. Am eager to participate in anything that may be beneficial.
- Have felt more able to relax and get problems into perspective. I think to carry on with sessions can only bring more improvement. Would definitely like to attend further sessions.
- After having Healing I felt as if it had just disappeared. I will come to Healing this week. The only problem taxi costing £15.
- I feel I can cope with situations a bit better now. Sandy helped me a lot. I would recommend Sandy to anyone and would like some more Healing with her.
- Last Wednesday felt good apart from dragging sensation. Went to Sutton but found two hours around town was enough. Never been able to go around town on my own since October 08, but did so for 2 hours after session. Slept best ever since August 08. I'm hoping to carry on just for peace of mind from this dreadful feeling in abdomen.
- This has been a journey of discovery for myself and awareness of other things re events/situations. Very beneficial to everyone – myself included. I'm indebted to you. Thank you very much for your help.

- I do feel relaxed having Healing when lying on bed. Thank you for the CD – it's nearly worn out!
- Due to my various conditions I feel that I would probably need to try several sessions to experience a positive result.
- Thank you for your help.
- A very big thank you to Sandy. Enjoy my session with Sandy. It helps to relax me, but as soon as I start walking it starts again.
- First few days felt exhausted and still in lots of pain, better the latter half of the week.
- Fine for the rest of the day and also the following day.
- Symptoms were bearable after the session, also the following day then gradually downhill. By a week later symptoms were back to being horrendous.
- It was a very pleasurable
- Healing does help to relax me.
- I have felt very relaxed.
- I have felt a lot more relaxed and have been able to sleep well most nights. However, I am still tired all the time and so find it hard to concentrate well, although this has improved a lot.
- I have not noticed any significant change. I am not sure if this treatment would work. It is probably very individual. I am very grateful for your help and I am prepared to try any treatment.
- I found the first session very enlightening and relaxing.
- I have noticed a vast improvement since the Healing session. I would like to thank the Healer greatly for the session. I found it to be very helpful indeed.
- The symptoms were less troublesome after the session until the last 24 hours (for 6 days).
- I would participate tomorrow (in Healing sessions) given the chance.
- In myself I have felt a little better but sickness is still there.
- I have tried to recreate the feeling of inner calm and had some success. Thinking about what the Healer said to me during the session has made me look differently at my symptoms. I feel that could benefit from these sessions and would be keen to try it out.
- After the first Healing session, I felt good for a few days, then the IBS started again.
- Felt a lot more relaxed this week.
- Don't feel quite as relaxed as I did last session but I do feel not as fed up.
- Felt really good to start with, but life makes the symptoms gradually

return. Learning to manage them. Healer was excellent.

- The following day my pain returned the moment I woke up, but I did have a day without pain.
- The treatment helped me to relax. I feel one to one Healing is better for me and I feel that I could get more from this kind of Healing.
- Very much better, less pain.
- After session there seems to be some improvement. The one session I had was very uplifting
- Felt good following session, however as week progressed symptoms intensified. Following conversation and session I have taken a different line with people who are stressing or pressurising me.
- The day after my Healing session (19 November) I was in considerable discomfort still – mainly in leg, difficulty walking on left foot too, no quality sleep. However (20 and 21 November) no pain whatsoever during the day, no pain whilst sleeping – uninterrupted sleep. Unfortunately, pain and all associated symptoms have now returned with a vengeance. I would be very grateful to be included in any Healing sessions.
- I do not consider any benefit to be sufficiently noticeable and as attending, driving, parking trauma would make it self-defeating.
- Since having this session, I've been constantly eating fruit. From having one piece every two weeks, to over my 5 a day. I felt very sick half an hour after the session, but since have had a constant craving for fruit every day. Monday this week, I just ate fruit all day. Before, I struggled to eat an apple once every two weeks. I eat chocolate every day, and for a week after I hadn't touched a piece. Usually I would eat lots every day, even though I still feel unwell. I really think this session has made this happen. Many thanks.
- I found it to be much more beneficial than I had thought it would be. Keen to participate.
- Many thanks for the opportunity of seeing your Healer on my last visit. It left me very relaxed.
- Although scoring is negative, I am not responding in knee-jerk way to pressures placed. I have actively sought measures to reduce stress and feel better for it. Initially I was sceptical but the session proved wholly worthwhile and points out things the person doesn't always see. Thank you for being a man [Dr Singh] with incredible vision.
